PROJECTS/RESEARCH

Android Application on Databases

Developed an online database Android application which creates databases and tables without the need of SQL. A simple UI app for easier use of databases for the users.

Medical Chatbot on Azure Cloud

Developed a chatbot which allows users to chat with the inbuilt bot regarding medical help. The whole bot service was made in Azure using LUIS.

Language Prediction using Deep Neural Networks

Developed a language prediction system using sklearn, TensorFlow and Keras in Python. The network contained 3 hidden layers, each having over 300 neurons. The accuracy of the system was found to be 97.95%.

Debt Calculator App using Angular and FireBase

An application to calculate the debts collected by different clients of an organization. The whole application was developed and designed in Angular 5 with a real-time database stored in FireBase Cloud.

CO-CURRICULARS

- Executive member of the Social and the Environment Club.
- Volunteered as an usher for Burj Al Arab Swim Run '17.
- Volunteered as an usher for NU Skin event at Burj Park, Dubai Mall.
- Active member of MSP (Microsoft Student Partner) Programme.
- Worked as a promoter for Samsung in GITEX Fall 2016.
- Attended workshops on Cryptology, Network Management, IoT, iOS App Development.
- Participated in various coding competitions and hackathons.

SOFTWARE SKILLS

Web Development - HTML, CSS, JS(including frameworks), PHP, Angular

App Development - Android, iOS/XCode/Swift

Cloud Technologies - Azure, AWS

Database Languages - MySQL, Redis

Software Languages - C, C++, Python, Java, R
